Pulmonary Function Test

Indicates loss of function in the lung.

Breast US

Early diagnosis of breast cancer and diseases

Gastroscopy

Examination of esophagus, stomach and 12 intestines

Hemogram

It is the main marker in the treatment of anemia and blood diseases.

Glucose

Diabetes diagnosis and follow-up

Full Urine

Early diagnosis of kidney and urinary tract diseases

Aspartat transaminaz (AST)

It is a liver function test.

Alanine aminotransferase (ALT)

It is a liver function test.

Gamma-glutamyl transferase (GGT)

It is a liver function test.

ALKALINE PHOSPHATASE

Diagnosis of liver, biliary tract, heart and kidney diseases

Urea

It is a kidney function test.

Creatinine

It is a kidney function test.

TSH

Diagnosis and monitoring of goiter disease

Free T3

Thyroid Function Test

Free T4

Thyroid Function Test

Peripheral Spread

It is the gold standard for lymphoma and leukemia.

CRP

It is used in the follow-up of Heart and Infectious Diseases.

HBsAg

Hepatitis B is a marker. It is also important in liver cancers.

Anti HBsAg

Hepatitis B is a marker. It is also important in liver cancers.

HCVAG

Hepatitis-C is a marker. It is also important in liver cancers.

homocysteine

Cardiovascular Risk Detection

Alfafetoprotein

Indicates liver, testicular and ovarian cancers

CA 19-9

It is important for the follow-up of colorectal cancers and pancreatic cancers.

Erythropoietin

Indicates kidney cancer.

CA125

Early signs of ovarian cancer

CA 15-3

Determination of breast cancer

CYFRA 21-1

Indicates esophageal, lung and bladder cancer.

CA 72-4

Indicates Stomach Cancer.

Beta HCG

It shows trophoblastic moles.

LDH

Shows lymphoma and testicular seminoma.

Occult Blood in Stool

Early colon cancer screening and detection of gastrointestinal bleeding

Sedimentation

It rises in cancers and chronic diseases.

Luteinizing Hormone

Ovulation in women, secretion of testosterone hormone in men
